

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

STATED MEETING, JUNE 21st, 1842.

VICE PRESIDENT MORTON in the Chair.

DONATIONS TO MUSEUM.

A specimen, in skin, of *Felis Canadensis*, (Northern Lynx,) from Fox river, Illinois; of *Felis* ———, from S. Carolina, and one of *Tetrao urogallus*, (Wood Grouse,) from the Alps, also in skin. From Dr. William Blanding.

Dr. Blanding also presented a skeleton of *Rana pipiens*, and one of *Rana fontinalis*, both of which had been prepared by the large red-ant of this country. Also a skin of *Vespertilio Pennsylvanica*, and a dried inflated lung of *Emys rubriventris*.

DONATIONS TO LIBRARY.

Onzième Rapport Annuel sur les Travaux de la Société d'Histoire Naturelle de l'Isle Maurice; par M. Louis Bouton. Maurice, 1841. From Mr. Wm. Hembel.

VERBAL COMMUNICATIONS.

Dr. Goddard remarked, in reference to the inflated lung presented this evening, that it offered a very good type of the lobule of the human lung; and that although each lobule of the latter was isolated and distinct from all the rest, its air cells communicated freely with each other; a fact, the discovery of which was due to Professor Horner.
